

NNAMDI AZIKIWE UNIVERSITY, AWKA

ANAMBRA STATE, NIGERIA

www.unizik.edu.ng

OFFICE OF THE REGISTRAR AND SECRETARY TO THE SENATE

This is to inform the entire University community and the General Public that Post UTME, Direct Entry and other relevant Screening Examination for 2021/2022 admission exercise will be conducted with an automated O' level and UTME results grading system introduced last year by our University.

This is also in consideration of the very large number of applications, the need to comply with COVID-19 preventive guidelines of the Federal Government of Nigeria and the prevailing security situation in our region.

Candidates are advised to go to JAMB accredited CBT centers /JAMB Offices and upload their O' level result/s to JAMB CAPS Portal on or before Sunday 12th December, 2021 in order to be considered in the 2021/2022 admission exercise.

Please note that candidates should not use regular/ non JAMB accredited cyber cafes for result/s upload to JAMB CAPS Portal.

In order to ensure transparency in the 2021/2022 admission exercise the following calculation formula will be used for the exercise.

CALCULATION FORMULA USED FOR THE POST-UTME 2021/2022 ADMISSIONS SCREENING EXERCISE

UTME CANDIDATES:

Candidates will be screened based on their JAMB scores and O' level result for the four subjects taken in JAMB. The following considerations will apply:

A. RATIO- The ratio will be 70:30. i.e. 70% JAMB score and 30% O' level subject score

$$70/100 = 0.7; 30/100 = 0.3$$

B. RANKING OF O'LEVEL RESULTS SCORES– O' level results will be ranked as given below:

A1= 90, B2= 80, B3= 70, C4= 60, C5= 55, C6= 50, D7= 25, E8 to F9=0, Awaiting Result (AR) =0

For each candidate, the O' level subjects used will be the subjects the candidate sat for in JAMB. E.g. for a candidate who sat for English, Mathematics, Chemistry and Physics in JAMB, the grades obtained in candidate O' level results in these subjects will be used to calculate the O' level points obtained.

C. BONUS– A candidate who credited his four subjects in a single sitting will get a bonus of 10 points (i.e. Bonus =10). A candidate who credited his four subjects in two sitting will get no bonus (i.e. Bonus = 0).

D. CALCULATIONS –

$$\text{Final score} = [(\text{JAMB SCORE} \times 0.7) + [(\text{O' level score} + \text{Bonus}) \times 0.3]$$

ILLUSTRATIONS: A student scored 280 in JAMB and had O' level results distributed as given in the table below:

SUBJECTS	JAMB SCORES	O'LEVEL RESULTS	O'LEVEL SCORES
English	66	A1	90
Mathematics	78	B3	70
Physics	70	B3	70
chemistry	66	C5	55
TOTAL	280		285

i. Single Sitting:

Final score= Weighted JAMB score + Weighed O' level score

$$\begin{aligned} & (280 \times 0.7) + [(285 + 10) \times 0.3] \\ & = 196 + 88.5 \\ & = 284.5 \end{aligned}$$

ii. Two Sitting: Weighted JAMB score + Weighed O' level score

$$\begin{aligned} & (280 \times 0.7) + [(285 + 0) \times 0.3] \\ & = 196 + 85.5 \\ & = 281.5 \end{aligned}$$

Note: The difference between the final screening scores of a candidate who credited his four subjects in a single sitting and the candidate who made it in two sittings is 3 (i.e. 284.5 - 281.5)

Signed
Barr. Philomena Iwara Okoye
